

Christmas Competition 2023

Friday Dec 15th at Boronia

Christmas should be fun with a capital F.....

OK, Christmas should be Fhristmas!and Fun

The club already has a stock of Kmart Anko gliders, and we all know what they look like, plus a packet of cocktail sticks, some dowel and another packet of rubber bands. Just what you need to make a catapult launch missile.....or glider. So, what can we do to have a bit of fun with them?

That's all the info you are getting at the moment..... but there will be a few very simple fun comps, mainly aimed at getting a Kmart Anko glider to fly where and when you want. Using a simple catapult launch system created, by you, on the day. So basically it will be back to basics for trimming and making the plane fly where you want it to go. Rules will be published nearer the day so as to avoid any advance adjustments. Planes and "stuff" will only be available on the day.....but all will be free.

If the truth be known this is probably due to the rules being finalised and any suggestions for competition will be considered but must be clearly written on a \$5 note.

(Bribery on the day will be considered as mandatory for any winners.)

Volunteers needed, but can be press-ganged on the day, preferably ones who can still bend and read a tape measure and another to write it all down and calculate the scores.

That's enough info for now, except to say that the gliders are free BUT only after having taken part in the small simple Xmas fun comps.

They could also be the basis in some form or the other for next year's Birdy Comp in 2024.....nuf sed.....just a thought to mull over .

On totally another note Ron VB had a brilliant idea at “Mullum ditto” a few weeks ago when he suggested that the club needs a “*FREE to a good, bad, or indifferent home*” day for preloved, broken or even badly landed models.....indoor stuff only of course and suggested the Birdy comp next year.

Well how about we hold one this Christmas at Boronia on the 15th!

So as not to interrupt the deadly serious fettling and trimming of the models for the fun comps taking place after smoko we could use the far end of the hall and lay out our stuff for inspection. Must be “**FREE TO A NEW HOME**” and all stuff not swopped taken home because we don’t want to litter the hall.....do we.

Bins are already there but NOT for our use.
